Portfolio: portfolio-ashen-eta-dk8pgubzc4.vercel.app

Professional Summary

Backend Developer with 3+ years of experience building scalable, secure RESTful APIs, microservices, and serverless applications using Node.js, Express, TypeScript, Firebase Cloud Functions, MySQL, PostgreSQL, and MongoDB. Skilled in JWT authentication, Firestore data modeling, Joi-based request validation, and third-party API integrations including eKYC/KYC verification (PAN, GSTIN, Aadhaar) and payment gateways (Razorpay). Familiar with cloud and DevOps tools (AWS, Azure, Docker, Kubernetes, CI/CD). Strong background in database design, query optimization, and end-to-end project delivery within agile, cross-functional teams.

Technical Skills

- Backend Development: Node.js, Express.js, JavaScript (ES6+), TypeScript, RESTful API design, Microservices Architecture, API security best practices
- Authentication and Security: JWT (JSON Web Token) authentication and authorization, Firebase Authentication
- Cloud, Serverless and DevOps: AWS (Cloud Practitioner certified), Microsoft Azure, Docker, Kubernetes, CI/CD, Firebase Cloud Functions, Firebase Storage (Busboy multipart uploads)
- Databases: MySQL (schema design, indexing, stored procedures, query optimization), PostgreSQL, MongoDB, Firebase Firestore (NoSQL data modeling, batch writes, composite IDs, array-contains/n-gram search)
- Validation and Schema Design: Joi (TypeScript), conditional validation (Joi.when()), custom regex patterns, reusable schema architecture
- Third-Party Integrations: eKYC/identity verification APIs (PAN, GSTIN, Aadhaar via MessageCentral), Razorpay payment gateway
- Tools and Workflow: Postman (API testing), Git/GitHub/GitLab (version control, branching, pull requests), Agile collaboration

Professional Experience

Backend Developer | Ticket9 Event Tech Private Limited *Jan 2026 – Present*

- Designed and developed Firebase-based activity scheduling and event/booking management platform, including Cloud Functions, Firestore data models, and Firebase Storage utilities
- Built availability generation and schedule synchronization logic for activity bookings, keeping Firestore schedule data consistent
- Built robust Joi validation schemas in TypeScript with conditional logic for coupon/discount systems and a dynamic form-builder application
- Integrated eKYC and business identity verification (PAN, GSTIN, Aadhaar) via MessageCentral API, resolving payload/header and multipart content-type issues for reliable verification flows
- Implemented Firestore substring/keyword search using n-gram token-array patterns with array-contains queries, balancing scalability and cost
- Resolved Cloud Functions deployment issues (timeout errors from module-level initialization, Admin SDK errors) to improve deployment reliability

Activity and Booking Management Platform (Firebase/Node.js)

- Built scalable backend for activity scheduling, KYC verification, payment integration, and booking workflows using Cloud Functions, Firestore, and third-party API integrations

Backend Developer | **Ahsan Solutions** *Jan 2023 – Jun 2025*

- Developed RESTful APIs and backend logic for multiple client projects spanning health and nutrition tracking, NGO donation management, e-commerce, and corporate websites

Rouh Nutrition — Subscription Health and Nutrition Platform

- Optimized MySQL database design for scalable user and subscription data management; built BMR-based personalized meal plan logic

Alsafa NGO Web Application

- Built secure RESTful APIs for donor registration, donation history tracking, and beneficiary management

AutoMoto E-Commerce Platform

- Implemented product search/filtering, secure authentication, shopping cart, and order management with Razorpay payment integration

---

Trainee – Process Associate | **Aggregate Intelligence India Pvt. Ltd.** *16 May 2022 – 17 Oct 2022*

- Extracted structured and unstructured data from travel, hospitality, and self-storage market sources; performed data integrity checks against MySQL records

Education

MCA (Master of Computer Applications) — Alagappa University | *2022–2024*
BCA (Bachelor of Computer Applications) — Bharathidasan University | *2018–2021*

Certifications

- AWS Certified Cloud Practitioner — Amazon Web Services (AWS) | 2025
